

**COMMONWEALTH OF VIRGINIA  
STATE AIR POLLUTION CONTROL BOARD**

**NOTICE OF  
ESTABLISHMENT OF REGULATORY  
AD HOC ADVISORY GROUP  
CONCERNING**

**MAJOR NEW SOURCE REVIEW REFORM  
(9 VAC 5 CHAPTER 80)**

In accordance with the public participation procedures of the State Air Pollution Control Board, an ad hoc advisory group has been selected to assist the Department of Environmental Quality in the development of proposed amendments to provisions of the Regulations for the Control and Abatement of Air Pollution (9 VAC 5 Chapter 80) concerning major new source review reform. The names of the group members are provided on the attached list.

The primary function of the group is to develop recommendations for department consideration through the collaborative approach of negotiation and consensus.

Members of the group have been selected to ensure that the group as a whole meets the following criteria:

- Representation should reflect a balanced perspective of the issues under consideration (regulated community, general public, and department staff)
- Representation from the regulated community should include a balance of source types and sizes.
- To facilitate the work of the ad hoc group, membership should be limited to a workable size.

The attached list includes all persons or organizations who responded to the NOIRA and requested to be on the group. Based on the criteria cited above, all of those on the list were recommended for inclusion on the group.

The activities of this group will probably require several meetings, and the work of the group must be completed by mid-December in order to present any recommendations to the board at its March 2005 meeting. Shortly, we will notify group members of the first meeting.

If you have any questions, please call the agency contact specified below.
